

## ***Financial and Administrative Information - An Overview***

Thank you for choosing 'International Montessori' for your children. We would like to extend a warm welcome to you!

International Montessori is a collection of small and vibrant school locations with beautifully renovated historic buildings and sustainable campuses. It offers stimulating learning environments to children and students aged 1 to 18 years old.

### International School

The school is a long-established international school and is proud to have a global representation of humanity. Our main aim is for the children in this community to develop good concentration, intrinsic motivation, high self-esteem, take responsible actions, and learn constructive behaviour and empathy for others. Thereby, making a contribution to the world as a whole.

In the classrooms, children work in a variety of learning-settings which includes individual and small group presentations. The didactic materials, high teacher to child ratio and differentiation in teaching styles help children develop skills and characteristics and have the opportunity to become strong decision makers.

### Registration and Accreditation

The school is registered with several departments, accreditation and training bodies. The most important ones being:

- 'Kind and Gezin/Opgroeien' for Childcare registration for the Toddler Community.
- The Flemish Ministry of Education for the legal registration of school-aged children.
- Association Montessori International (AMI) for worldwide training of teachers and in the Montessori approach and programme for children and students aged 0 to 18 years old.

### **Working together within the framework of the school:**

Congratulations! You are choosing a wonderful programme and philosophy that helps children and students in developing their full potential. 'It takes a village to raise a child'. Working together; within the mission, policies and procedures of the school in a constructive and positive triangular fashion; parents, child and teachers/school provide the best possible learning environment.

### **A good start lasts a lifetime:**

The mission and objectives of the school promote positive and constructive values that aim towards children becoming self-regulating people and independent thinkers. Equipped with these skills, children are able to contribute to their own happiness and well-being and also that of those with whom they interact.

We wish to give you, your children, and older students, a truly enriching experience at International Montessori. The school's exceptional environment – welcoming, sincere and nurturing – supports the child in growing into the person they are meant to become. Here, they are given the opportunity to cultivate a broad range of intelligences and associated skills, enabling them to develop into well-rounded individuals who think critically, and who care for themselves, others, and the environment at large.
